About VA Mobile Health

VA Mobile aims to improve the health of Veterans by providing technologies that expand clinical care beyond the traditional office visit.

VA Mobile underscores VA's commitment to transform the way care is delivered and to improve health care coordination between Veterans and their care teams. VA recognizes that mobile health is emerging as an essential element of health care, and is dedicated to providing the most up-to-date technologies to enhance patient experiences.

Put VA Data to Work

Empowering our partners to build innovative, Veteran-centered solutions.

Explore VA APIs

We want to empower our partners to build innovative solutions for Veterans. So we designed a framework to deliver a modern API development experience and rolled out our first set of standards-based APIs.

VA Benefits API

Build tools to help Veterans electronically manage, submit, track, and receive notifications on their claims.

VA Facilities API

Get information on VA facilities including contact information, location, hours of operation, available services, appointment wait times, and patient satisfaction.

VA Health API

Build tools to help Veterans manage their health, view their medical records, schedule an appointment, find a specialty facility, and securely share their information with caregivers and providers.

VA Veteran Verification API

Build tools to help Veterans verify their Veteran status electronically on job sites, e-commerce sites, and third-party benefit sites.

Discover How VA's Partners Use Our APIs

Today, 65% of disability and pension claims get to VA through paper or fax. Veterans and their families often use Veteran Service Organizations (VSOs) to help file claims, but in order to successfully submit a claim, VSOs need a way to securely access and submit a Veteran's information. VA created the Benefits Intake API to streamline the data transfer process. Now VSOs can use VA's Benefits Intake API to drastically cut down on the steps required to submit a claim, and send the necessary data directly to VA with the press of a button.

Ready to Get Started?

Below is a list of steps below to help you get started with the VA API Platform Management:

1. [Request an API Key](#)
2. [Build your app](#)
3. [Request production access](#)

2019 Midyear Review

Over the past 6 months, the Department of Veterans Affairs (VA) and the Office of Information and Technology have driven aggressive progress toward VA's Digital Transformation, enabling a seamless, unified Veteran experience.

[Download the Midyear Review Fact Sheet](#)

Latest News

Doing "Digital" Differently at VA

What distinguishes our digital transformation is our purpose, our "why." It drives me and everyone in OIT as we work together toward the same goal: improving the lives of Veterans.

[Read the full article »](#)

OIT Aggressively Pursuing Modernization of VA Network

Even though many Veterans may never think about the VA network, its viability and modernization are essential to VA's ability to serve Veterans today and in the future.

[Read the full article »](#)

Veterans Opt for More Security with Multi-Factor Authentication

Increase in multi-factor authentication (MFA) user activity indicates that Veterans are choosing to add another level of protection against identity theft and other risks. MFA provides a more secure digital experience for Veterans and is a key part of U.S. Department of Veteran Affairs' (VA) digital transformation strategy.
