

# VA Health & Benefits App

*Release process & QA*

# Agenda

- How the app gets to veterans
- What the QA team does

**How the app gets to veterans**

All implementation work (BE, UX,  
FE, QA, Product)

Release  
signoff

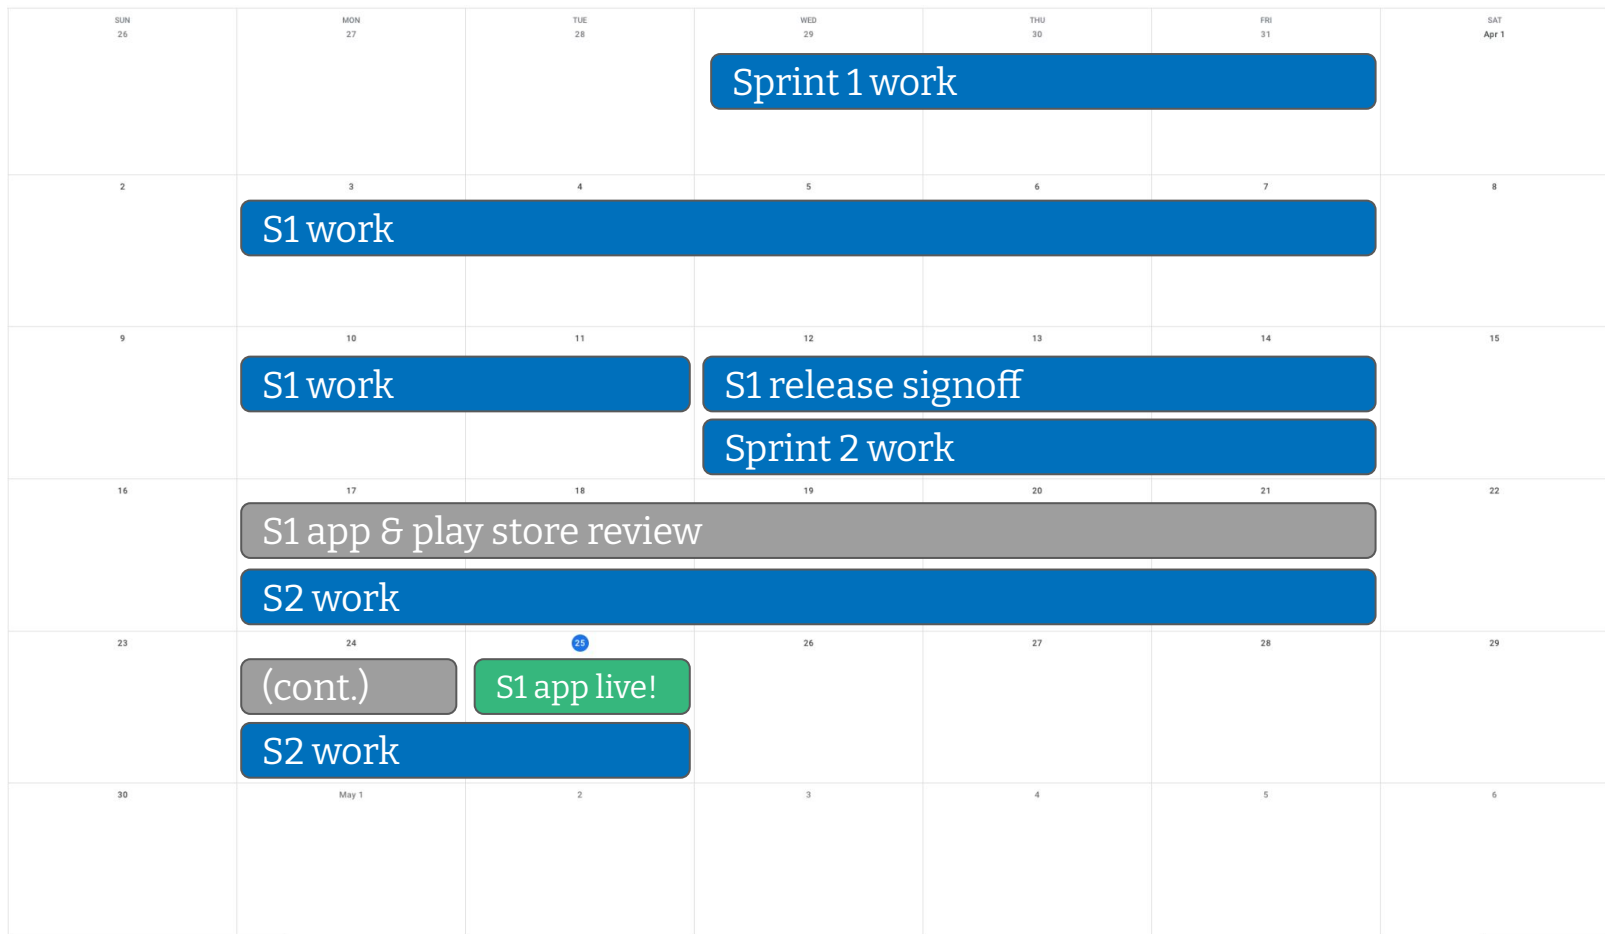

App & play store  
review

App live in  
PROD  
(app/play  
stores)

Veteran  
downloads/  
updates  
app\*

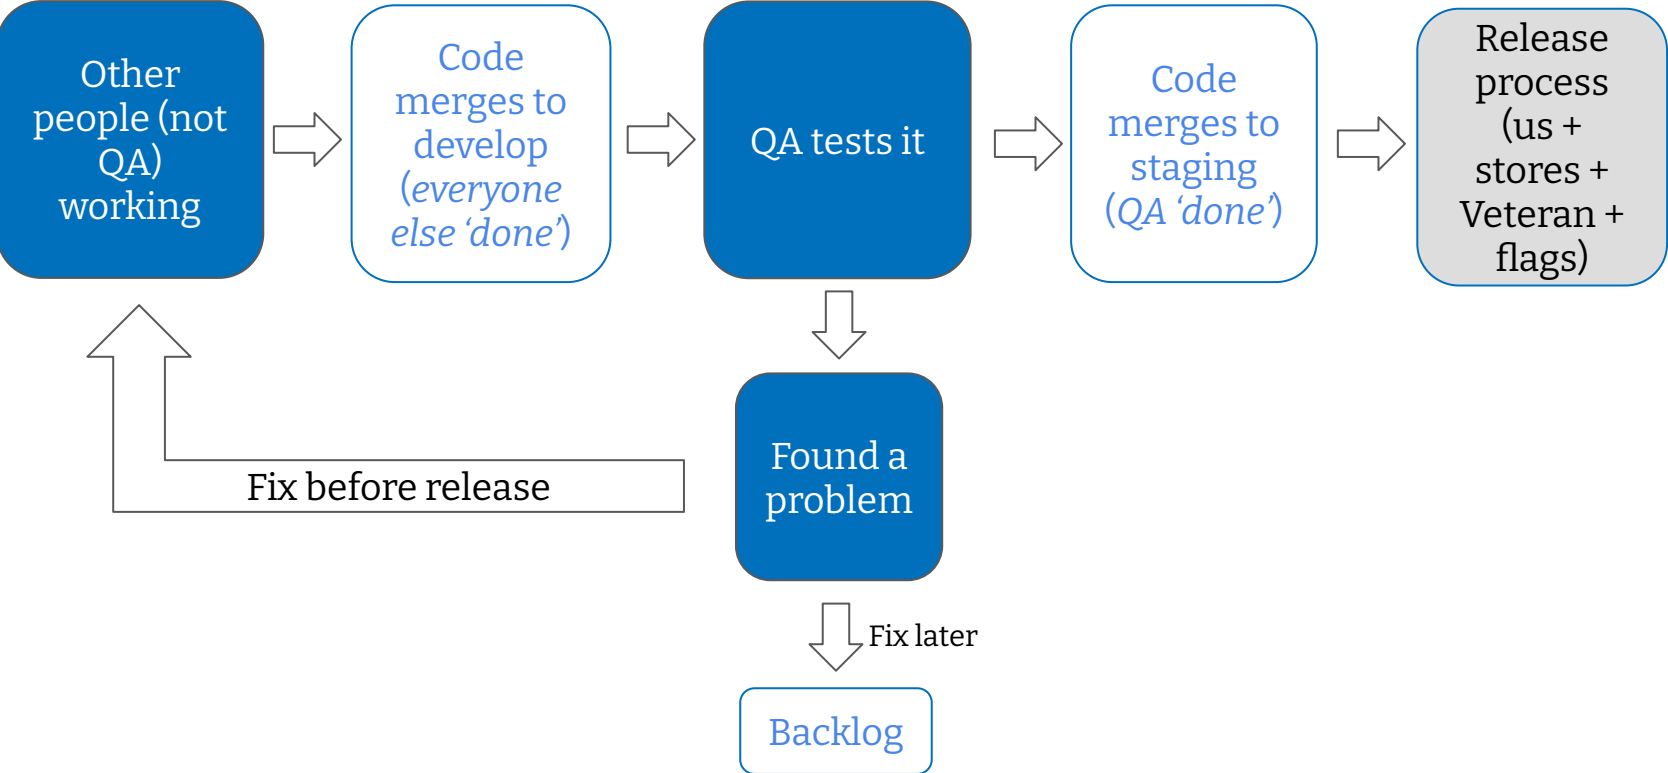

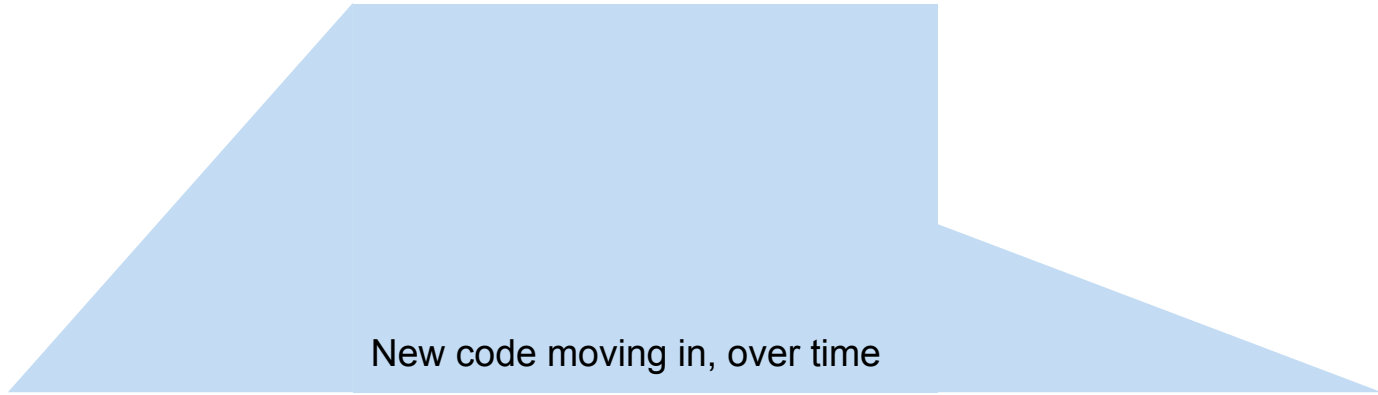

\*Feature flag  
(remote config)  
turns features  
on/off

**What the QA team does**

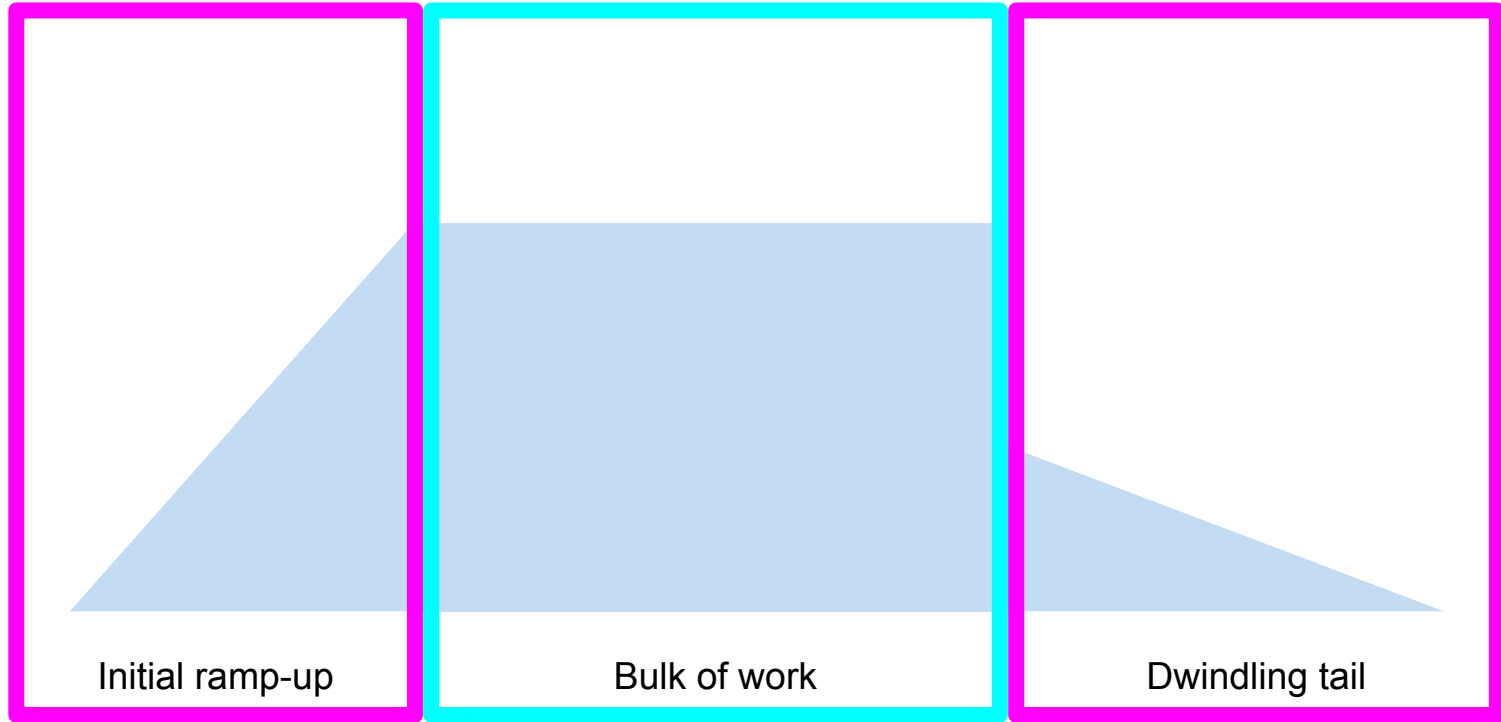

# Feature implementation

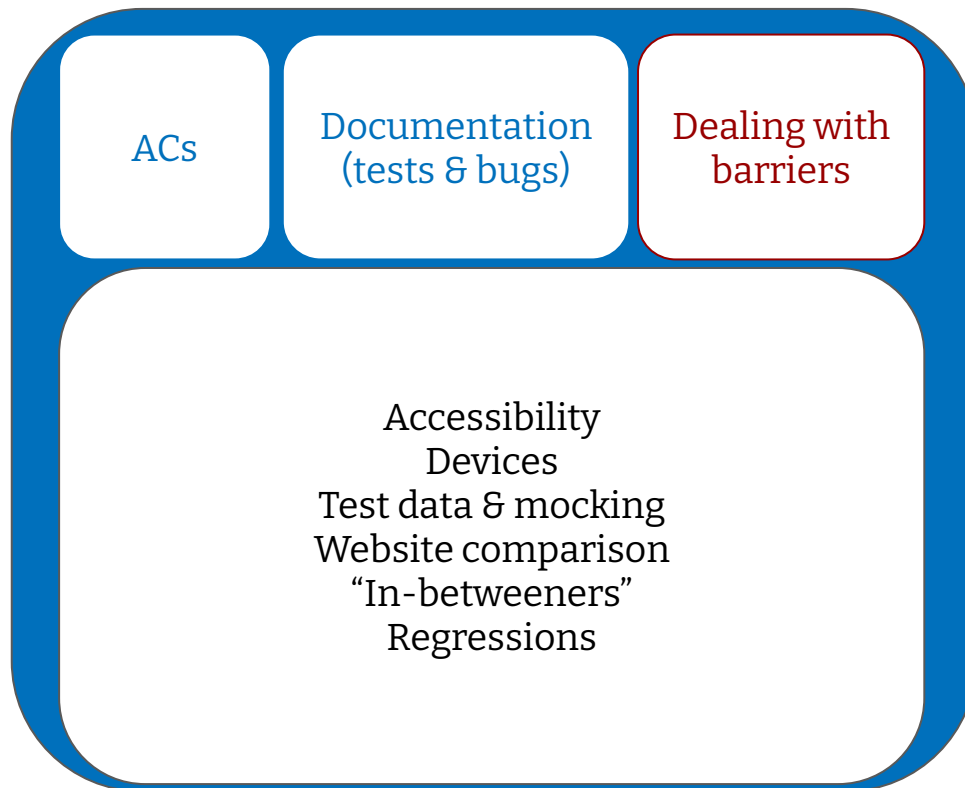

# “QA tests it”

# QA - beyond testing

- QA consultation early in feature implementation
- UI Automation
- Root cause analysis
- Process ownership
- Pre-testing prep (plan, write, review, revise)

# Elephants in the room

- Can we automate everything?
- Can [other role] just do the testing?
- Can we test faster?
